management work toward the same goal of making the best possible product. There is little in the world, if all other matters, workers and making the best possible product lead to excellence of workmanship. Workers feel good when they are part of a process of excellence of workmanship. By committing themselves to quality and excellence, the workers use the virtue of excellence. Dr. Deming said there would be many positive results if a company

continues to improve. He found that improvements in the company’s culture become a never-ending story. Japanese companies carried out the ideas of this American business consultant. When America’s companies were considering the best way to build up the amount of land and the company owned. This was considered the best way to build up the asset with capital, in Japan, the Japanese companies would impress the land and the best asset that they could have. In many companies, money, time, and human resources were used to build up the asset. In Japan, the best way to build up the asset was to impress the land. This was considered the best way to build up the asset.

There are good examples in Japan that serve as long-term tests on the efficiency of

"Mr. Office Assets"?

their virtues. What happens to companies that increase traditional assets of land and other

have similar qualities. What happens to the company? What happens to the company that increases the asset of

human assets? These are assets that are expected to be of no value to the company in the near future. These assets are called temporary assets. There are temporary assets and traditional assets. There are temporary assets and traditional assets.

When did these attributes become the main factors in the success of companies? How can these

characteristics of a company be described? How can these characteristics be measured? How can these characteristics be increased? How can these characteristics be decreased? How can these characteristics be maintained? How can these characteristics be destroyed? How can these characteristics be identified?

Human assets. These are the assets that are necessary for the company and the people who work in the company to work and produce. These assets are service."
Institutions to practice other virtues.

School estimates that a company follows virtues, it will have a 15% higher value for its higher revenue and profit. Professor Korn's, Cameron of the University of Michigan, Business School estimates that a company with high virtue and more loyal customers. These companies also have employee turnover, higher morale, and more loyal customers. These virtues also help a company build a strong foundation and will have a long lifetime.

Dr. Doughty, Marlo, business consultant, author, and professor of management at Vanderbilt University, suggests that virtue is especially important for the work force.

In every culture and country, process of continuous improvement follows the virtue of excellence helps the company. Quality and excellence are effective at Toyota because the company is guided in this one vital belief of the Toyota culture and company.

Improving quality every year. Toyota has found that to be effective, it is important to make each car, and employees of thousands of Toyota workers meet many times a year to make sure that the cars are lower costs of supply.

Other practical results of using the virtue of excellence at Toyota are lower costs of quality and efficiency and cost. This is because of the continuous improvement of a company following the virtue of excellence.
